## NEW 'HD+ WOOD IMITATION' PREPAINTED COATING

Dear Customers,

We are pleased to announce an important product news: **TECSEDO**, in cooperation with an international **pre-painted** steel supplier, developed a super polyester base paint wood imitation new coating who has exceptional technical characteristics and extraordinary aesthetic qualities, with a 'touch' effect.

The new coating will be available starting from the end of March 2017 and it is important to highlight that it will be furnished with a performance warranty.

The **5 layers** paint, with a total thickness up to **40 micron**, is highly resistant to environmental conditions and, at the same time, it provides a structure which is really similar to wood.

The new pre-painted wood imitation panels will be initially available in **Golden Oak** color and at a later stage in **Dark Oak**.

We are glad to inform you that price of this innovative product will be more competitive than price of classic PVC coating.

Samples of panels and technical sheets are immediately available for your assessments and will be sent to you upon your request.

As usual, our staff is at your disposal for any information that may be necessary.

Kind regards

Sales Dept.
