NEW TECSEDO PANEL Rake V16

Dear Customers,

Following the great success of the Microribbed panels with a 8 mm pace, many customers required a version of the Rake panel with pace increased to 16 mm.

Therefore, today we are happy to announce the implementation of panels:

TECSEDO® Base Rake V16 TBR V16

TECSEDO® Safe Rake V16 TSR V16

These new panels are available in the standard widths 500 mm and 610 mm and, only for the V16 version, in the new intermediate width 555 mm.

Samples of panels for your assessments will be sent to you as soon as we will receive your kind requests.

Furthermore, the data sheet product is at your disposal in any time

Our staff is at your disposal for any information you may need.

Kind regards

Sales Dept.
